Art Unit: 1614

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-34, drawn to a composition of a combination of a first polyanionic component and a second polyanionic component, classified in class 424, subclass 78.04.
- II. Claims 35-40, drawn to a method of use of claims 1-34 as a lubricating agent, classified in class 424, subclass 78.04.

The inventions are distinct, each from the other because of the following reasons:

The above-delineated inventions are independent and patentably distinct each from the other. Each of the above groups is directed to a totally different subject matter. A reference which anticipates the invention of group I, would not necessarily anticipate or make obvious the invention of Group II. The search for the above inventions would not be co-extensive particularly as to the require literature search. Each of the above groups is capable of supporting its own patent. Therefore, restriction for examination purpose is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
